Education

Oxford Brookes University, Oxford, UK

M.Sc. Motorsport Engineering, Merit
September 2018 - September 2019

- Conducted research on Driverless vehicle analysis and compared control theories for Formula Student Autonomous Vehicle as master's dissertation.

SRM University, Chennai, India

B. Tech, Automobile Engineering, 8.3 GPA
July 2014 - May 2018

- Designed, analyzed, and fabricated Variable Length Intake Manifold as B. tech project.

Skills

CAD: Catia V5, Solidworks, creo

CFD: Ansys fluent, star ccm+

Other: LS-dyna, Matlab/Simulink, Adams, EcoCal, EM-tune, C++, Avl vsm; MoTec i2, Ni multisim, python

Projects

Driverless Formula Student Vehicle, Control strategies and event analysis

- Conducted research and analysis of autonomous electric vehicle.
- Studied various control theories and control strategies used in the Formula student and DARPA challenge for autonomous vehicle.
- Developed MPC and Lateral-Stanley controller for OBR electric Vehicle.
- State space models prepared for each controller design.

Variable Length Intake Manifold for small 4S IC engine

- Active length variation design to adapt the RAM supercharging between 3000-7000 RPM range.
- Rack & pinion design for length variation.
- Construction of self-designed rope dynamometer for testing and validation with 80% accuracy.

CFD analysis of wing & nose of F1 car

- Study of effect of yaw in lift and downforce generation experienced during cornering of F1 car.
- The design is as such to produce maximum downforce at 6-degree yaw angle.

IED Blast simulation on V-hull tank

- Developed V-Hull tank from the old v-hull military design material properties.
- CATIA v5 for meshing and LS-DYNA for Blast simulation.
- Oasys was used as post-processing tool.

Experience

Post Graduate Design Engineer – Automotive Systems Design

Eindhoven University of Technology, Netherlands

10/2022 – PRESENT

- Sub-system software development & systems engineering.
- Developed Software for Extrinsic Calibration of ImRadar & camera in MATLAB achieving less than 15% error.
- Vehicle Dynamics and Controls.

Post Graduate Mechanical Engineer

Coexlion, Bengaluru, India

04/2022 – 10/2022

- Performing CAE, FEA analysis for OEM clients.
- 1D-Modelling and mathematical simulation of sub-systems.
- Modelling kinematic parameters of two wheelers suspension and steering.
- Control strategies and Motor Controller design.

Sr. Research & Development Mechanical Engineer

InGO Electric, Bengaluru, India

04/2021 – 03/2022

- Leading the design team of 4.
- Developing novel powertrain system with SRM Motor to effectively utilize the Low-end torque.
- Developing mathematical 1D Matlab/Simulink model of the motor-CVT system.
- Defining processes and methodologies like FMEA, DFM, GD&T, etc.
- Providing CAE team with load case development for static and fatigue loading at component and full vehicle level.
- MBD model development for studying Vehicle Dynamics.
- Won the ASC '21 (Altair Start-up Challenge), securing 3.5lac Rs award.

Founder

RS Automotive pvt ltd, Bengaluru, India

01/2020 – 03/2022

- Automotive 2W and 3W Electric vehicle Consultancy.
- Tech support for organizations and start-ups in chassis, CAE and kinematics.
- Vehicle integration: CAD, CAE, GD&T, DFM, DFMA.

Team Member (AI, EV & CV)

Oxford Brookes Racing, Oxford, UK

09/2018 – 01/2020

- Being a stand-in powertrain EV lead, managed a team of five to design, fabricate and document reports for competition.
- Conceptualized and carried out the calculations for the exhaust manifold to reduce noise by 3-4 dB and improve performance using AQWT.
- Developed a lateral controller for autonomous car using Simulink and hardware requirements for testing software, being control systems engineer.

Team Leader

Infieon Supermileage, Chennai, India

02/2017 – 04/2018

- Managed a team of 26 People, the team won its first award overseas for technical innovation at shell eco-marathon Asia '18.
- Introduced a variety of new sub teams to restructure the team, improving productivity with the limited resources available, resulting in the team attaining best Indian team status.

Publications

"MPC Controller for Autonomous Formula Student Vehicle", SAE Technical Paper 2020-01-0089, 2020, doi: 10.4271/2020-01-0089

"Design optimisation of Bicycle Wheel Hub Assembly for Automotive Applications", SAE Technical Paper 2022-01-0262, 2022, doi: 10.4271/2022-01-0262

Additional Certifications

Model-based Automotive Systems Engineering

Chalmers-edX

- Modelling and simulation of system dynamics in automotive engineering
