## Education

**Oxford Brookes University,  
Oxford, UK**

M.Sc. Motorsport Engineering, Merit  
September 2018 - September 2019

- Conducted research on Driverless vehicle analysis and compared control theories for Formula Student Autonomous Vehicle as master's dissertation.

**SRM University, Chennai, India**

B. Tech, Automobile Engineering, 8.3 GPA  
July 2014 - May 2018

- Designed, analyzed, and fabricated Variable Length Intake Manifold as B. tech project.

## Skills

**CAD:** Catia V5, Solidworks

**CFD:** Ansys fluent, star ccm+

**Other:** LS-dyna, Matlab/Simulink, Adams, EcoCal, EM-tune, C++, Avl vsm; MoTec i2, Ni multsim

## Projects

**Driverless Formula Student Vehicle,  
Control strategies and event analysis**

- Conducted research and analysis of autonomous electric vehicle.
- Studied various control theories and control strategies used in the Formula student and DARPA challenge for autonomous vehicle.
- Developed MPC and Lateral-Stanley controller for OBR electric Vehicle.
- State space models prepared for each controller design.

**Variable Length Intake Manifold for  
small 4S IC engine**

- Active length variation design to adapt the RAM supercharging between 3000-7000 RPM range.
- Rack & pinion design for length variation.
- Construction of self-designed rope dynamometer for testing and validation with 80% accuracy.

**CFD analysis of wing & nose of F1 car**

- Study of effect of yaw in lift and downforce generation experienced during cornering of F1 car.
- The design is as such to produce maximum downforce at 6-degree yaw angle.

**IED Blast simulation on V-hull tank**

- Developed V-Hull tank from the old v-hull military design material properties.
- CATIA v5 for meshing and LS-DYNA for Blast simulation.
- Oasys was used as post-processing tool.

## Experience

**Post Graduate Design Engineer – Automotive Systems Design**

Eindhoven University of Technology, Netherlands

10/2022 – PRESENT

- Sub-system software development using C++, systems engineering
- Working on several projects from industry players in Netherlands on automotive systems design
- Vehicle Dynamics and Controls

**Post Graduate Mechanical Engineer**

Coexlion, Bengaluru, India

04/2022 – 10/2022

- Performing CAE, FEA analysis.
- 1D-Modelling and mathematical simulation of sub-systems.
- Modelling kinematic parameters of two wheelers suspension and steering.
- Control strategies and Motor Controller design.

**Sr. Research & Development Mechanical Engineer**

InGO Electric, Bengaluru, India

04/2021 – 03/2022

- Leading the design team of 4.
- Developing novel powertrain system with SRM Motor to effectively utilize the Low-end torque.
- Developing mathematical 1D Matlab/Simulink model of the motor-CVT system.
- Defining processes and methodologies like FMEA, DFM, GD&T, etc.
- Providing CAE team with load case development for static and fatigue loading at component and full vehicle level.
- MBD model development for studying Vehicle Dynamics.
- Won the ASC '21 (Altair Start-up Challenge), securing 3.5lac Rs award.

**Founder**

RS Automotive pvt ltd, Bengaluru, India

01/2020 – 03/2022

- Automotive 2W and 3W Electric vehicle Consultancy
- Tech support for organizations and start-ups in chassis, CAE and kinematics

**Team Member (AI, EV & CV)**

Oxford Brookes Racing, Oxford, UK

09/2018 – 01/2020

- Being a stand-in powertrain EV lead, managed a team of five to design, fabricate and document reports for competition.
- Conceptualized and carried out the calculations for the exhaust manifold to reduce noise by 3-4 dB and improve performance using AQWT.
- Developed a lateral controller for autonomous car using Simulink and hardware requirements for testing software, being control systems engineer.

**Team Leader**

Infieon Supermileage, Chennai, India

02/2017 – 04/2018

- Managed a team of 26 People, the team won its first award overseas for technical innovation at shell eco-marathon Asia '18.
- Introduced a variety of new sub teams to restructure the team, improving productivity with the limited resources available, resulting in the team attaining best Indian team status.

## Publications

"MPC Controller for Autonomous Formula Student Vehicle", SAE Technical Paper 2020-01-0089, 2020, doi: 10.4271/2020-01-0089

"Design optimisation of Bicycle Wheel Hub Assembly for Automotive Applications", SAE Technical Paper 2022-01-0262, 2022, doi: 10.4271/2022-01-0262

## Additional Certifications

**Model-based Automotive Systems Engineering**

Chalmers-edX

- Modelling and simulation of system dynamics in automotive engineering
